

Summary of the working program of the academic discipline

«ORTHOPEDIC TREATMENT OF DISEASES OF THE TMJ (TEMPOROMANDIBULAR JOINT)»

General Educational Program of higher education (specialist's degree programs)
31.05.03 "Dentistry"

Department of Prosthetic Dentistry and Orthodontics

1. The purpose of mastering the discipline: participation in the formation of relevant competencies – UC-1, PC-6, PC-7: formation of the foundations of the doctor's clinical thinking, mastering the skills of examination, differential diagnosis, rationale for the diagnosis of the disease, determining the prognosis of the disease, drawing up a treatment plan for patients, mastering the basic manual skills in carrying out orthopedic treatment necessary to start the professional activity of a future dentist, as well as in-depth study by students of sections of orthopedic dentistry necessary for the formation of systemic knowledge in the field of materials science, prevention, diagnosis and orthopedic methods of treating defects in hard tissues of teeth and dentition.

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline refers to the part formed by the participants of educational relations of Block 1 of GEP HE (C 1.2.4).

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) and professional (PC) competencies

№	Competence code	The content of the competence (or its part)	Code and name of the competence acquisition metric	As a result of mastering the discipline, the students should:		
				know	be able to	possess
1.	UC-1	Able to carry out a critical analysis of problem situations based on a systematic approach, develop an action strategy	<p>IUC 1.1. Knows: methods of critical analysis and evaluation of modern scientific achievements; basic principles of critical analysis</p> <p>IUC 1.2. Able to: gain new knowledge based on analysis, synthesis, etc.; collect data on complex scientific problems related to the professional field; search for information and solutions based on action, experiment and experience</p> <p>IUC 1.3. Has practical experience: researching the problem of professional activity using analysis, synthesis and other methods of intellectual activity; developing an action strategy to solve professional problems</p>	Methods of analysis and evaluation of modern scientific achievements of dentistry; basic principles of critical analysis	Obtain new knowledge in dentistry based on analysis, synthesis, etc.; collect data on complex scientific problems related to the professional field; to search for new information and solutions based on actions, experimentation and experience carried out in dentistry	Has practical experience: researching the problem of professional activity in dentistry using analysis, synthesis and other methods of intellectual activity; development of an action strategy for solving professional problems in dentistry
2.	PC-6	PC-6 readiness to collect and	IPC 6.1 Knows: The method of collecting complaints and medical history from patients (their	Methods of diagnosis, treatment,	Substantiate pathogenetic justified	Conduct pathophysiological

	<p>analyze complaints and other information from the patient (relatives/legal representatives), his medical history, interpretation of examination results, laboratory, instrumental, pathological and other studies, incl. diagnostic studies using modern technical means and digital technologies, in order to recognize the state or establish the presence or absence of a dental disease, symptoms, syndromes of dental diseases, the establishment of nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, and other regulatory documents of the Ministry of Health of the Russian Federation (Procedure for the provision of medical care, Standard of medical care, Clinical recommendations on the provision of medical care, etc.)</p>	<p>legal representatives). Methods of physical examination of patients (examination, palpation, percussion, auscultation). The procedure for providing medical care to the adult population with dental diseases The procedure for providing medical care to children with dental diseases Clinical guidelines on the provision of medical care to patients with dental diseases Medical care standards</p> <p>IPC 6.2. Able to: interpret the results of examination, laboratory, instrumental, pathological and other studies, incl. diagnostic studies using modern technical means and digital technologies, in order to recognize the state or establish the presence or absence of a dental disease, symptoms, syndromes of dental diseases, the establishment of nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, and other regulatory documents of the Ministry of Health of the Russian Federation (Procedure for the provision of medical care, Standard of medical care, Clinical recommendations on the provision of medical care, etc.)</p> <p>Develop a plan for the treatment of children and adults with dental diseases in accordance with the procedures for the provision of medical care, clinical guidelines, taking into account the standards of medical care.</p> <p>IPC 6.3 Has practical experience: interpretation of the results of examination, laboratory, instrumental, pathoanatomical and other studies, incl. diagnostic studies using modern technical means and digital technologies, in order to recognize the state or establish the presence or absence of a dental disease, symptoms, syndromes of dental diseases, the establishment of nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, and other regulatory documents of the Ministry of Health of the Russian Federation (Procedure for the provision of medical care, Standard of medical care, Clinical recommendations on the provision of medical care, etc.)</p> <p>Development of a treatment plan for children and adults with dental</p>	<p>rehabilitation and prevention among the adult population and adolescents, taking into account their age and sex groups</p>	<p>methods (principles) of diagnosis, treatment, prevention among the adult population and adolescents</p>	<p>analysis of clinical syndromes</p>
