Summary of the working program of the academic discipline:

Assistant of Pediatric Dentist

<u>General Educational Program of higher education (specialist) for speciality</u> 31.05.03. "Dentistry

Department: <u>Pediatric dentistry</u>

1. The purpose of mastering the discipline (*participation in the formation of relevant competencies – specify the codes*):

The aim of the discipline: participate in the formation of competencies UC-1, GPC-1, GPC-2, GPC-6, GPC-8, GPC-9, GPC-11, PC-1, PC-2, PC-5, PC-6, PC-8, PC-9, PC-12.

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline refers to the core part (or *the part formed by the participants of educational relations*) of Block 1 of GEP HE.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) or/and general professional (GPC) or/and professional (PC) competencies

No. n/a	Comp etence code	The content of the competence (or part of it)	Code and name of the competence acquisition metric	As a result of mastering the discipline, the students should:		
				know	be able to	possess
1.	UC-1	Ability to think abstractly, analyse, synthesise.	UC-1 . Is able to critically analyse problematic situations using a systematic approach, to develop a strategy of action	Basic principles and algorithms for analysing and synthesising information in the professional medical activity of the paediatric dentist	Analyse the situation and systematise the information on each clinical case in paediatric dentistry	clinical thinking, synthesis of findings and situation analysis depending on the specific clinical case in paediatric dentistry
2.	PC-1	Ability to diagnose dental diseases and pathological conditions of patients	PC-1. Ability and readiness to implement a set of measures aimed at preservation and promotion of health and including the formation of a healthy lifestyle of the patient (their relatives/legal	The basics of preventive measures for the formation of dental health in children and adolescents, the influence of hereditary factors and	Lectures, talks, discussions on the factors affecting the dental health of children and adults, the causes of major dental diseases among	methods of dental education, auditory, speech and illustrative motivation to promote the dental health of children and their

			representatives). Prevention of the emergence and/or spread of dental diseases, their early diagnosis, identification of causes and conditions of emergence and development, as well as prevention.	environmental factors on the The influence of hereditary factors and environmental factors on the occurrence of major dental diseases among the child population.	children and adolescents, and measures to prevent dental diseases in the family and in society.	parents.
3.	PC-2	Ability to carry out measures to prevent dental diseases	PC-2 . Ability and readiness to carry out preventive medical examinations, medical check-ups for different categories of citizens and to carry out medical check- ups for patients with dental pathologies	The basics of planning and carrying out preventive medical check- ups, check-ups and the implementatio n of follow-up care for children and adolescents with dental pathology.	Conduct preventive medical check- ups and follow-up care for children and adolescents with dental diseases.	methods for preventive dental check- ups of the maxillofacial region in children and adolescents of different ages and methods for the follow-up of children and adolescents with different nosological forms of dental diseases.
4.	PC-5	Application of the basic principles of the organisation of dental care in medical institutions and their structural subdivisions.	PC-5 . Ability and readiness to apply socio-hygienic techniques to collect and medico- statistical indicators of dental morbidity, quality indicators of dental care delivery.	Rules for the preparation and maintenance of medical records, including in the form of an electronic document, in medical institutions with a dental profile. Rules for	Draw up a work plan and report on the work. Complete medical records, including electronic records, and monitor the quality of the records. Analyse the medical and	Drawing up a work plan and a report on their work. Keeping medical records, including in the form of an electronic document. Supervise the performance of job duties

				working in medical information systems and the information and telecommunic ation network "Internet". The duties of medical staff in dental health care institutions. The organisation, equipment and facilities of dental surgeries, departments and outpatient clinics. Health, safety and fire safety requirements, emergency procedures.	statistical indicators for the incidence of dental disease. Use health information systems and the Internet in their work. Supervise the performance of the duties of the medical staff on duty. Use patient personal data and patient confidentiality information in their work.	by medical staff on duty. The use of health information systems and the Internet. The use of personal information about patients and medical secrets in their work.
5.	PC-6	Diagnosis of dental diseases and pathological conditions of patients.	PC-6. Ability to identify in patients the main pathological conditions, symptoms, syndromes of dental diseases, nosological forms according to the International Statistical Classification of Diseases and Related Health Problems, X	Pathological physiology and pathological anatomy, clinic, diagnosis and differential diagnosis, nosological forms of the main dental diseases in children and adolescents according to ICD-10.	Identify in patients the main pathological conditions, symptoms, syndromes and nosological forms of dental diseases in children and adolescents.	methods The definition of pathological conditions, symptoms and syndromes of dental diseases and their nosological forms in children and adolescents.
6.	PC-8	Conducting a medical examination	PC-8. Willingness to assess temporary disability, to participate in	The procedure for issuing certificates of incapacity for work. Medical	Identify signs of temporary care for a child with a dental disease.	Conducting an assessment of temporary incapacity to

			medical and social expert assessment, to establish the biological death of a person	indications for referral for medical and social expert assessment. Requirements for medical records.	Prepare medical documentation for referral of children with dental conditions to the federal state medical and social expert assessment institutions.	work to care for a sick child suffering from a dental disease. The registration of the necessary medical documentatio n for medical and social expert assessment in the federal state medical and social expert assessment institutions. Referral of children and adolescents with dental diseases for medical and social expertise. Issue certificates of incapacity for work, including for persons caring for a
7.	PC-9	Treating patients with dental problems	PC-9. Willingness to determine the need for natural healing factors, medicines, non- pharmacological therapy and other methods in patients with maxillofacial diseases in need of medical rehabilitation and	Indications and contraindicatio ns for the use of natural healing factors, drugs, non-medicinal therapy and other methods in children and adolescents	Identify indications and contraindicatio ns for the use of natural healing factors, medication, non-medicinal therapy and other methods in patients	sick family member. Has practical experience: determining indications and contraindicat ions for the use of natural healing factors, medicines, non-
