«Reconstructive maxillofacial surgery»

General Educational Program of higher education (<u>specialist's degree programs</u>): 31.05.03 Dentistry

Department: : oral and maxillofacial surgery

1. The purpose of mastering the discipline (*participation in the formation of relevant competencies*): GPC-1, PC-6, PC-7

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline « Reconstructive maxillofacial surgery » refers to the part «Disciplines» of Block 1 of GEP HE «Dentistry».

The discipline «Modern aspects of odontogenic inflammation» is taught in 10 semester of study.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) or/and general professional (GPC) or/and professional (PC) competencies

	Compe	The content of	Code and name of		astering the discip	oline, students	
	tence the the competence			should:			
N⁰	code	competence (or	-				
• .=		its		know	be able to	possess	
		part)		KIIOW		possess	
1.	UC 1	Ability to abstract thinking, analysis, synthesis	IUC 1.1 Know: Methods and techniques of philosophical analysis; searching and processing information IUC 1.2 be able to: analyses and evaluate the situation on their own;to use educational, scientific, popular literature, Internet on a given topic for the note-taking; IUC 1.3 possess: possess the skills of presenting an independent point of view, analysis and logical thinking	Methods and techniques of philosophical analysis; searching and processing information	analyses and evaluate the situation on their own; to use educational, scientific, popular literature, Internet on a given topic for the note- taking	possess the skills of presenting an independent point of view, analysis and logical thinking	
2.	PC -6	The identification of a patient's of pathological conditions, symptoms, syndromes of dental diseases, nosological forms according to the ICD-10 and the related health problems	IPC 6.1 Know: Etiology, pathogenesis, diagnosis, treatment and prevention of the most common dentistry diseases of surgical profile principle of the ICD-10 IPC 6.2 Be able to: To diagnose dental diseases of surgical patients to justify making a diagnosis according to the ICD-10 IPC 6.3 Possess: to make a diagnosis according to the ICD-10	Etiology, pathogenesis, diagnosis, treatment and prevention of the most common dentistry diseases of surgical profile principle of the ICD-10	To diagnose dental diseases of surgical patients to justify making a diagnosis according to the ICD-10	to make a diagnosis according to the ICD-10	
3.	PC-7	Ability to determine the tactics of management of patients with various dental diseases in accordance with clinical recommendation s of other regulatory	IPC 7.1 Know: Methods of drug and non-medicamentous treatment, medical indications for the use of medical products in dental diseases; groups of drugs used to provide medical assistance in the treatment of dental diseases; mechanism of their action, medical indications and contraindications to the appointment; compatibility, possible complications, side	Methods of drug and non- medicamento us treatment, medical indications for the use of medical products in dental diseases; groups of	Develop a treatment plan for children and adults with dental illnesses in accordance with medical procedures, clinical recommendati ons, standards	Selection and prescription of medicines, medical products (including dental materials) for the treatment of dental diseases in children and adults in accordance with the current medical procedures, clinical recommendations,
