Summary of the working program of the academic discipline

«HISTORY»

(name of the academic discipline)

General Educational l	Program of higher education (<u>specialist's degree programs</u>)	
	31.05.03 DENTISTRY	
code, name of the sp	pecialty	
Department:	SOCIAL SCIENCES AND HUMANITIES _	

1. The purpose of mastering the discipline HISTORY (hereinafter – the discipline):

1.1. The purpose of mastering the discipline:

The goal is to expand and deepen students' knowledge in the field of national and world history, the development of analytical (critical) thinking, public speaking and discussion skills, communication, creative cooperation in humanitarian cognition.

The purpose of studying the discipline is also to participate in the formation of the following competencies: UC-1, UC-3, UC-5, GPC-1.

- 1.2. Tasks of the discipline:
- 1. Formation of the ability to carry out a critical analysis of problem situations based on a systematic approach, to develop a strategy of actions;
- 2. Development of the ability to organize and manage the work of the team, developing a team strategy to achieve the goal;
- 3. Teaching students to analyze and take into account the diversity of cultures in the process of inter-cultural interaction;
- 4. Formation of the ability to implement moral and legal norms, ethical and deontological principles in professional activity.
 - 1.3. Requirements to the deliverables of mastering the discipline

As a result of completing the discipline, the student should

Know:

- methods of critical analysis and evaluation of modern scientific achievements in the field of historical science;
 - the basic principles of the critical analysis of the sources of the study of history;
- problems of selecting an effective team for setting and solving public problems based on historical experience, the main conditions for effective teamwork;
 - fundamentals of strategic human resource management based on historical experience;
- models of organizational behavior, factors of formation of organizational relations in history;
- strategies and principles of teamwork, the main characteristics of the organizational climate and interaction of people in the organization;
 - main categories of philosophy, philosophy of history;
 - laws of historical development;
 - basics of inter-cultural communication;
- fundamentals of medical ethics and deontology, fundamentals of legislation in the field of health-care, legal aspects of medical activity in the aspect of their historical continuity;

Be able to:

- gain new knowledge based on analysis, synthesis and other methods of working with historical sources;
 - collect data on complex scientific problems related to the professional field and the

public sphere;

- to search for historical information and solutions to social problems based on actions, experiment and experience;
- determine the management style for the effective work of the team, develop a team strategy, apply the principles and methods of organizing team activities;
- to present professional information competently and in an accessible manner in the process of intercultural interaction;
 - comply with ethical standards and human rights;
- analyze the features of social interaction taking into account national, ethno-cultural, confessional characteristics;
- apply historically established ethical norms and principles of behavior of a medical worker in the performance of their professional duties, knowledge of modern legislation in the field of healthcare in solving professional tasks, apply rules and norms of interaction of a doctor with colleagues and patients (their legal representatives);

Possess:

- analytical skills of studying the problem of professional activity with the use of analysis, synthesis, evaluation of information from various historical and sociological sources and other methods of intellectual activity;
- skills of developing a strategy of actions to solve professional problems based on historical experience, skills of oral and written presentation of their understanding of socially significant historical processes;
- skills of participation in the development of a teamwork strategy, participation in teamwork, distribution of roles in the conditions of team interaction, the ability and skills to participate in discussions and polemics;
- skills of productive interaction in a professional environment, taking into account national, ethno-cultural, confessional characteristics, overcoming communicative, educational, ethnic, confessional and other barriers in the process of inter-cultural interaction;
- skills in solving standard tasks of professional activity based on ethical norms and deontological principles when interacting with colleagues and patients (their legal representatives), knowledge of legal aspects of medical activity.

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline HISTORY refers to the core part of Block 1 of GEP HE (Academic discipline index B1.O.3).

The discipline is taught in 1 semester / 1 year of study.

- 2.2. The following knowledge, skills and abilities formed by previous academic disciplines are required for mastering the discipline: not provided
- 2.3. Mastering the discipline is required for forming the following knowledge, skills and abilities for subsequent academic disciplines:
 - 1. Philosophy

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) and general professional (GPC)

	Competen	The content of the	Code and name of		of mastering t e students sho	the discipline, ould:
