Summary of the working program of the academic discipline

« LIFE SAFETY MANAGEMENT»

General Educational Program of higher education (specialist's degree programs) 31.05.03 DENTISTRY

Department: Disaster Medicine

1. The purpose of mastering the discipline: participation in the formation of relevant competencies: UC - 8; GPC - 6.

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline Life Safety refers to the core part (or the part formed by the participants

of educational relations) of Block 1. B.33.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition Mastering the discipline aims at acquiring the following universal (UC) or/and general professional (GPC) or/and professional (PC) competencies:

Nº	Competen ce code	The content of the competence (or its part)	Code and name of the competence acquisition metric	As a result of mast discipline, the stud Know	0	Possess the skills
1.	UC-8 "Life Safety"	Is able to : create and maintain safe living conditions in everyday life and in professional activities to preserve the natural environment, ensure the sustainable development of society, including in the situation of a threat and the occurrence	ID - 1 UC - 8.1 ID - 2 UC - 8.2 ID- 3 UC - 8.3	IUC 8.1 Knows: factors of harmful influence on vital activity; Algorithms of actions in case of emergencies and military conflicts;	IUC 8.2 Knows how to: identify dangerous and harmful factors within the framework of the activities carried out, create and maintain safe living conditions in everyday life and in professional activities	IUC 8.3 Has practical experience: participation in planned exercises to develop rules of conduct in case of emergencies, first aid delivery; adheres to workplace safety regulations

2. GPC-6 Primary Health Care" Is able to organize patient care, provide primary health care, ensure the organization of work and the adoption of work and care. ID -1 provide primary health care, ensure the organize patient care, provide primary health care, ensure the organize patient care, provide primary health care, ensure the organize patient care, provide primary health care, ensure the organize patient care, provide primary health care, ensure the organization of work and the adoption of work and the adoption of work and the adoption of work and the emergency conditions at the prehospital stage, in emergency situations, epidemics and methods of providing medical care to patients emergency situations, epidemics and methods of providing medical care to patients emergency situations, epidemics and methods of providing medical care to patients emergency situations, epidemics and methods of providing medical care to patients in the emergency situations, epidemics and in the centers of mass destruction in acrea of mass destruction in acrea of mass destruction in the centers of modical care to patients in conditions that pose a threat to the provision di medical emergency situations, epidemics and in mass casually situations ID -1 methods of providing medical recommendation, taking into accordance with emergency situations, epidemics and in mass casually situations ID -2 methods of providing medical recommendation, taking into accordance with emergency wital functions of the human body to patients in conditions that provision of medical care; provision of medical care; provision of medical care; provision of the human body to patients in conditions that pose a threat to the patients in conditions of the human body ID -2 medical care to patients in conditions that provision of the human body<			of				
2. GPC-6 Is able to organize patient care, provide primary health care, ensure the organization of work and the adoption of more and the adoption of more and the adoption of provision al the adoption of situations, epidemics and the adoption of provising meticals in emergency situations, epidemics and the adoption of more and the adoption of more and the adoption of more adoption situations, epidemics and the adoption of more amergency situations, epidemics and the adoption of gree adoption situations, epidemics and the adoption of situations, epidemics and the account the standards of metergency situations, epidemics and in mass casualty situations epidemics and in mass casualty situations ID -2 ID -2 GPC - 6.1 GPC - 6.2 GPC - 6.3 GPC - 6.3 GPC - 6.3 GPC - 6.4 GPC - 6.4 GPC - 6.5 GPC - 6.5 GPC - 6.6 GPC - 6.6 GPC - 6.7 GPC							
2. GPC-6 IS able to organize patient care, provide primary health care, ensure the organization of work and the adoption of work and the graphic situations at the probes in a conditions IS able to organize patient care, provide primary health care, ensure the organization of work and the adoption of and in mass casualty situations ID - 1 (BPC-6.1 (Her legal representatives); methods of patients (their legal representatives); methods of patients (their legal representatives); methods of patients (their legal representatives); methods of patients (care to patients) (their legal representatives); methods of patients (care to patients) (their legal representatives); methods of patients (care to patients) (their legal representatives); methods of principles and methods of providing medical care to patients in cluding in emergency situations, epidemics and in areas of mass situations, epidemics and in areas of conditions at the prehospital stage, in emergency situations, epidemics and in mass casualty situations and in mass casualty situations ID - 1 (BPC - 6.1) ID - 2 (BPC - 6.2) ID - 2 (BPC - 6.3) ID - 3 (BPC -			-
