Summary of the working program of the academic discipline

« OPHTHALMOLOGY »

(name of the academic discipline)
General Educational Program of higher education (specialist's degree programs)
31.05.03 Dentistry
code, name of the specialty
Department:EYE DISEASES
1. The purpose of mastering the discipline (participation in the formation of relevant
competencies – specify the codes): UC-1, GPC-5, GPC-7, PC-6
2. Position of the academic discipline in the structure of the General Educational
Program (GEP).
2.1. The disciplineophthalmology refers to the core part (or the part formed by
the participants of educational relations) of Block 1 of GEP HE
3. Deliverables of mastering the academic discipline and metrics of competence
acquisition
Mastering the discipline aims at acquiring the following universal (UC) or/and general
professional (GPC) or/and professional (PC) competencies
Commanda Communication Code and name of As a negative discipling the

	Comp	nal (GPC) or/and profess Содержание	Code and name of	As a result of ma	astering the disc	cipline, the

5. Sections of the academic discipline and competencies that are formed

№ п/п	Competence code	Section name of the discipline	The content of the section in teaching units
1	2	3	4
1.1	UC-1, GPC-5	Clinical anatomy, physiology of the organ of vision and its accessory apparatus	The organ of vision in anatomical and physiological terms - embryogenesis of the auxiliary apparatus of the eye and orbit - anatomy of the bone orbit - the ratio of the orbit and paranasal sinuses, the cranial cavity anatomy of the auxiliary apparatus of the eye - fibrous capsule of the eye and its purpose - anatomy and histology of the vascular membrane of the eye - anatomy and histology of the retina - anatomy of the vitreous body - anatomy of the lens — - anatomy of the optic nerve and the visual pathway

1.2	UC-1, GPC-5,7	Methods of examination of the visual organ and its accessory apparatus	The visual analyzer is the main organ of cognition of the external world, anatomical and physiological features of the visual pathway - the concept of central vision (visual acuity, visual angle) - peripheral vision - visual adaptation - color perception - binocular vision - external examination of the eye and its appendages - examination of the anterior segment of the eyeball - study of the transparency of refractive and light-conducting media of the eye - methods and principles of ophthalmoscopy - biomicroscopy - methods of studying intraocular pressure - ultrasound methods of eye and orbit examination - radiation research methods in ophthalmology
1.3	GPC-5,7, PC-6	Diseases of the orbit, eyelids, lacrimal organs	General semiotics and classification - anomalies of eyelid development - inflammatory diseases of the eyelids: blepharitis, barley, chalazion (etiopathogenesis, clinic, diagnosis, treatment methods) Inflammatory diseases - orbits, - tear - producing - tear - conducting apparatus - Possible complications
1.4	GPC-5,7, PC-6	Conjunctival and corneal diseases	- inflammatory diseases of the conjunctiva (etiopathogenesis, - classification, clinic, diagnosis, treatment) - inflammatory - Keratitis: the relevance of the problem - etiopathogenesis - classification - clinic of bacterial and herpetic keratitis - diagnostics - treatment prevention
1.5	GPC-5,7, PC-6	Pathology of the vascular tract. Pathology of the lens.	Inflammatory diseases of the vascular membrane of the eye (etiopathogenesis, classification, diagnosis) - anterior uveitis, diagnostic signs, principles of treatment - posterior uveitis, main clinical manifestations, treatment Cataracts, the urgency of the problem etiopathogenesis

		Ī	1 '6' '
			- classification
			- clinic
			- diagnostics
			- conservative methods of treatment
			- surgical methods of treatment
			- aphakia, diagnostic signs, correction
			methods.
	GPC-5,7, PC-6	Glaucoma	Hydrodynamics of the eye.
			Glaucoma: classification, etiopathogenesis
			of various forms of glaucoma
			pathogenesis of glaucoma
			opticoneuropathy
1.6			- clinic of open-angle and closed-angle
1.0			forms of glaucoma
			- methods of early diagnosis of minutes
			conservative treatment, methods of
			surgical treatment of open- and closed-angle
			forms of glaucoma.
			- secondary glaucoma, treatment methods
	GPC-5,7, PC-6	Mechanical and chemical	- Modern classification of visual organ
		injuries of the visual organ	injuries
			- mechanical open injury of the visual organ
			(injuries of the orbit, the auxiliary apparatus
			of the eye, the eyeball): absolute and relative
			signs, clinic, diagnosis, complications.
			intraocular foreign bodies (classification,
1.7			metals)
1.7.			- the concept of sympathetic inflammation
			(etiopathogenesis, clinic, treatment,
			prevention).
			- chemical burns of the visual organ (acid,
			alkaline).
			- thermal burns of the visual organ
			- emergency measures for various types of
			burn injury.
			our injury.
