 APPROVED
Vice-Rector for Academic Affairs
E.S. Bogomolova
31 August 2021

WORKING PROGRAM

Name of the academic discipline: **ORGANIZATION OF MEDICINE SUPPLY OF THE POPULATION**

Specialty: **33.05.01 PHARMACY**

Qualification: **PHARMACIST**

Department: **MANAGEMENT AND ECONOMICS OF PHARMACY AND PHARMACEUTICAL TECHNOLOGY**

Mode of study: **FULL-TIME**

Labor intensity of the academic discipline: **36 academic hours**

Nizhny Novgorod
2021

The working program has been developed in accordance with the Federal State Educational Standard for the specialty 33.05.01 PHARMACY, approved by Order by Order of the Ministry of Science and Higher Education of the Russian Federation No. 219 of March 27, 2018.

Developers of the working program:

Maxim Alekseevich Mishchenko, PhD in pharmaceutical sciences, associate professor of the Department of management and economics of pharmacy and pharmaceutical technology.

The program was reviewed and approved at the department meeting (protocol No. 9 of 29.04.2021).

Acting head of the Department,
PhD in pharmaceutical sciences

29.04.2021

(signature) I.V. Spitskaya

AGREED

Deputy Head of EMA ph.d. of biology  Lovtsova L.V.

(signature)

29.04.2021

1. The purpose and objectives of mastering the academic discipline ORGANIZATION OF MEDICINE SUPPLY OF THE POPULATION (hereinafter – the discipline):

1.1. The purpose of mastering the discipline – participation in forming the following competencies:

- professional competence of (PC-2 (2.2), PC-5 (5.1-5.3)).

1.2. Tasks of the discipline:

1. Formation of basic, fundamental pharmaceutical knowledge in the specialty 33.0 5.01 Pharmacy.

2. Training of a specialist pharmacist with analytical thinking, well oriented in control-permitting and organizational-managerial activities in the field of circulation of medicines, having in-depth knowledge of related disciplines.

3. Formation of skills in mastering the latest technologies and techniques in the field of their professional interests.

4. Formation of competences of a specialist pharmacist in carrying out control and permitting procedures related to the circulation of medicines.

5. Mastering of organizational measures for storage, transportation, release and sale of medicines.

1.3. Requirements to the deliverables of mastering the discipline

As a result of completing the discipline, the student should

Know:

- the basics of health system resource management;
- the structure of the modern health care system of the Russian Federation;
- fundamentals of the legislation of the Russian Federation on protecting the health of citizens and ensuring sanitary and epidemiological well-being in the Russian Federation;
- the procedure for the formation and organization of the work of the commodity distribution network in the pharmaceutical market (retail and wholesale);
- principles and forms of state control and supervision in the field of circulation of medicines;
- the basic principles of state regulation and the pricing process for pharmaceutical goods at all stages of the movement of goods;
- legal, legislative and administrative procedures and policies relating to all aspects of pharmaceutical activities;
- features of the pharmacist's work to conclude contracts with enterprises, institutions in accordance with the procedure established by law;
- the basics of the organization of pharmaceutical care (outpatient-polyclinic and inpatient) to various groups of the population;
- the basics of organizing the provision of medicines to outpatients and inpatients with medicines and other pharmaceutical goods at full cost, as well as for citizens entitled to social assistance;
- the basics of organizing the procurement of medical property for state and municipal needs.

Be able to:

- monitor the state of resource support of the organization (structural unit);
- exercise control over pharmaceutical activities;
- to provide the population entitled to state social assistance;
- make reasonable economic decisions when carrying out activities in the field of circulation of medicines;

- determine the demand and demand for different groups of pharmaceutical products;
- draw up documentation of the established sample for the manufacture, storage, registration and release of medicines and other pharmaceutical products from pharmacy organizations;
- analyze the state of inventories and determine the sources of their financing;
- select a supplier, conclude supply contracts and draw up documentation on the claim form;
- place orders for the supply of goods;
- to form prices for pharmaceutical products at all stages of commodity promotion, including in-pharmacy manufacturing.

Possess:

- skills in developing activities to improve the efficiency of using the resources of the organization (structural unit);
- methods, methods of organization of work in the main links of the commodity distribution system of the pharmaceutical market, organization of pharmaceutical activities;
- regulatory and legal documentation regulating the procedure for the work of a pharmacy organization for accepting prescriptions and the requirements of medical and other organizations;
- regulatory and legal documentation regulating the procedure for the work of pharmacy organizations for the release of medicines and other pharmaceutical goods to the population, medical and other organizations;
- normative, reference and scientific literature for solving professional problems;
- methods of studying demand, forming an assortment and forecasting the need for medicines and other pharmaceutical products;
- ways of forming prices for medicines and other pharmaceutical goods;
- skills in the selection of optimal suppliers and procurement processes, taking into account previously conducted research on the market of medicines for veterinary use.

2. Position of the academic discipline in the structure of the General Educational Program of Higher Education (GEP HE) of the organization.

2.1. The discipline refers to the part formed by the participants of educational relations of Block 1 of GEP HE (B1.PER.E.6).

The discipline is taught in the 9 semester/5 year of study.

2.2. The following knowledge, skills and abilities formed by previous academic disciplines are required for mastering the discipline:

- introduction to the specialty;
- law;
- information support of the life cycle of medicines;
- information technologies in pharmacy;
- medical and pharmaceutical commodity science;
- management and economics of pharmacy;
- pharmaceutical propaedeutic practice.

2.3. Mastering the discipline is required for forming the following knowledge, skills and abilities for subsequent academic disciplines:

- management and economics of pharmacies.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following professional (PC) competence

№	Competence code	The content of the competence (or its part)	Code and name of the competence acquisition metric	As a result of mastering the discipline, the students should:		
				know	be able to	possess
1.	PC-2	Able to solve the tasks of professional activity in the implementation of the release and sale of medicines and other products of the pharmacy range through pharmaceutical and medical organizations, incl. with the use of modern technical means and digital technologies	PC-2.2.
