

Federal State Budgetary Educational Institution of Higher Education
"Privolzhsky Research Medical University"
Ministry of Health of the Russian Federation

APPROVED

Vice-Rector for Academic Affairs

E.S. Bogomolova

31 August 2021

WORKING PROGRAM

Name of the academic discipline: **ECONOMIC THEORY**

Specialty: **33.05.01PHARMACY**

Qualification: **PHARMACIST**

Department: **SOCIAL MEDICINE AND HEALTH CARE MANAGEMENT**

Mode of study: **FULL-TIME**

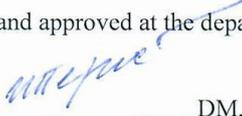

Labor intensity of the academic discipline: **72 academic hours**

Nizhny Novgorod
2021

The working program has been developed in accordance with the Federal State Educational Standard for specialty 33.05.01PHARMACY approved by Order of the Ministry of Science and Higher Education of the Russian Federation No. 988 of August 12, 2021.

Developers of the working program: Pozdeeva Anna Nikolaevna, assistant at the Department of Social Medicine and Health Care Management

The program was reviewed and approved at the department meeting (protocol No.01 June 2021 , date)

Head of the Department  DM, prof. I.A. Pereslegina

01 June 2021

AGREED

Deputy Head of EMA ph.d. of biology  Lovtsova L.V.

01 June 2021

1. The purpose and objectives of mastering the academic discipline: to create the necessary level of theoretical knowledge and fundamentals of economic science among the future doctors, allowing to adequately assess and effectively implement emerging economic relations in the course of professional medical activity.

1.1. The purpose of mastering the discipline: participation in the formation of the following universal and general professional competencies among students:

Able to carry out a critical analysis of problem situations based on a systematic approach, develop an action strategy (UK-1);

Able to make informed economic decisions in various areas of life (UK-10);

Able to prepare and apply scientific, research and production, design, organizational, managerial and regulatory documentation in the healthcare system (OPK-11).

1.2. Tasks of the discipline:

As a result of completing the discipline, the student should

1. know:

main stages and trends in the development of economic science; concepts and categories, principles and regularities, functions and laws of economic science; the specifics of the knowledge of the economic science of the practice of economic life; and etc.

analyze economic problems and social processes;

be an active subject of economic activity;

characterize the modern economic system of Russia;

evaluate the results of economic activity based on the calculation of the main indicators of the company;

analyze the main macroeconomic indicators in dynamics and in comparison with other countries;

based on the received and analyzed primary economic information, make competent management decisions

3. possess

basic economic concepts, categories, economic laws;

the main methods of studying economic processes and phenomena;

fundamentals of regional and international economics;

the basics of economic activity of enterprises, organizations, institutions, firms;

the economic foundations of the social policy of the Russian Federation;

economic foundations of the financial, credit, tax, banking policy of the Russian Federation, etc.

2. Position of the academic discipline in the structure of the General Educational Program of Higher Education (GEP HE) of the organization.

2.1. The discipline B1.B5 “ECONOMICS” refers to the core part of Block 1 of GEP HE (Academic discipline index).

The discipline is taught in 1 semester/ 1 year of study.

2.2. The following knowledge, skills and abilities formed by previous academic disciplines are required for mastering the discipline:

To study the discipline, knowledge, skills and abilities are necessary, formed by previous disciplines: jurisprudence, philosophy, history.

2.3. Mastering the discipline is required for forming the following knowledge, skills and abilities for subsequent academic disciplines:

The study of the discipline is necessary for the knowledge, skills and abilities formed by subsequent disciplines/practices: health economics, psychology and pedagogy, public health and healthcare.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) or/and general professional (GPC) or/and professional (PC) competencies

№	Competence code	The content of the competence (or its part)	Code and name of the competence acquisition metric	As a result of mastering the discipline, the students should:		
				know	be able to	possess
1.	UC-1	Able to carry out a critical analysis of problem situations based on a systematic approach, develop an action strategy	1.1 Knows: methods of critical analysis and evaluation of modern scientific achievements; basic principles of critical analysis 1.2 Able to: gain new knowledge based on analysis, synthesis, etc.; collect data on complex scientific problems related to the professional field; search for information and solutions based on action, experiment and experience 1.3 Has practical experience: researching the problem of professional activity using analysis, synthesis and other methods of intellectual activity; developing an action strategy to solve professional problems	main economic categories, laws and methods of economic science	apply the main economic categories, laws and methods of economic science in professional activities	skills to critically perceive information about the main economic problems and social processes, understand and analyze economic problems and social processes
2.	UC-9	Able to use basic	9.1 Knows: the	methodol	analyze	methodolog

		defectological knowledge in social and professional spheres	<p>basics of defectology</p> <p>9.2 Able to: establish effective communication and create a tolerant environment when working with people with disabilities</p> <p>9.3 Has practical experience in: medical, social and organizational support of people with disabilities when they receive medical care</p>	ogy for analyzing medical information	the development of the main indicators of the health system	y for calculating economic efficiency indicators in health care
3.	GPC-3	Able to the counteraction of doping use in sports and fighting against it	<p>3.1 Knows: fundamentals of the legislation in the field of countering the use of doping in sports mechanisms of action of the main drugs, used as doping in sports</p> <p>3.2 Able to: apply knowledge of action mechanisms of the main medicines used as doping in sports, organize the fight against it; carry out sanitary and educational work among different groups of the population.</p> <p>3.3 Has practical experience in:</p>	basics of economic activity of the organization	apply economic knowledge in professional activities	skills in the design of scientific, research and production, design, organizational, managerial and regulatory documentation in professional activities

			conducting sanitary and educational work aimed at the fight against doping in sports, among students, engaged in sports.

7. Types of assessment formats for ongoing monitoring and mid-term assessment

№	Semester No.	Types of control	Name of section of academic discipline	Assessment formats		
				types	number of test questions	number of test task options
1	2	3	4	5	6	7
1.	1	Current monitoring	Subject of economic science	Test	10	2
		Mid-term assessment		Individual survey		
2.	1	Current monitoring	Market mechanism	Individual survey, problem solving		
		Mid-term assessment		Test	10	2
3.	1	Current monitoring	Producer in a market economy	Written control work on the section	4	3
		Mid-term assessment		Individual survey, problem solving		
	1	Current monitoring	Competition theory	Test	10	2
		Mid-term assessment		Credit: final interview	1-2	
	1	Current monitoring	Patterns of functioning of the national economy	Individual survey, problem solving	1-2	
		Mid-term assessment		Test	10	2
	1	Current monitoring	Main macroeconomic problems	Written test	4	3
	1	Current monitoring	Main macroeconomic problems	Individual survey, problem solving		

				Test	10	2
		Mid-term assessment		Abstract	4	10-15
	1	Current monitoring	Regulation of the market economy	Individual survey, problem solving		
		Mid-term assessment		Test	10	2
				Final testing	4	4

** forms of current control: control of student's independent work, control of mastering the topic; written test work; forms of mid-term assessment: test, exam*

Examples of evaluation tools:

Test task example :

Choose one correct answer:

THE PRICE OF A GOOD WILL DECREASE IF THE SUPPLY OF THE GOOD

- a) will stay the same and demand will decrease
- b) will decrease, but demand will remain unchanged
- c) will stay the same and demand increases
- d) will decrease and demand will increase

WHEN DETERMINING THE QUALITY OF SUCH A FACTOR OF PRODUCTION AS "LABOR", ONE MUST PAY ATTENTION TO

- a) whether the employee has certain skills and abilities
- b) the willingness of the employee to participate in the life of the team
- c) the efficiency of the equipment used
- d) the presence of a labor protection system at the enterprise

Approximate topics of abstracts

1. History of formation and development of economic theory.
2. Human factor. The role of healthcare in its formation
3. Types and forms of ownership in the Russian economy
4. Privatization: concept, goals, methods, stages. Privatization in Russia in the 21st century
5. Features of market relations in healthcare
6. Medical service: concept, specific features and types
7. Disadvantages of a market economy. The role of the state in maintaining the functioning of the market mechanism
8. Features of the formation of demand and supply in the market of medical services
9. Modern money and its features
10. Russian pharmaceutical market. Development issues
11. Antimonopoly regulation of the Russian economy
12. State regulation of wages in Russia
13. Unemployment, its socio-economic consequences. State regulation of unemployment
14. Rent. Income from natural resources
15. Entrepreneurship Development in Healthcare
16. Modern economic crisis. Anti-crisis policy of the state
17. Inflation: causes, types, socio-economic consequences. Anti-inflationary policy of the state
18. Social policy of the state
19. The problem of income inequality in society
20. Globalization of the world economy

Examples of tasks on the topic "Producer in a market economy"

1. The fixed capital of the company "Electronics" is estimated at 30 million rubles. Its service life is 5 years. Three years later, as a result of technical innovations, the market price of similar equipment decreased by 20%. What will happen to the fixed capital of the firm in this situation and what will be its losses?

Sample solution to the problem:

The fixed capital of the company will depreciate and its direct losses will amount to 2.4 million rubles.

*$(30 - 30/5 * 3)$ \u003d 12 million rubles. (cost including depreciation after 3 years; $12 * 20/100 = 2.4$ million rubles - direct losses)*

2. A medical institution provides paid medical services. Within a month, 200 consultations were provided by a neurologist at a price of 100 rubles. The following month, as a result of the social and economic policy of the state, the income of the population increased by 25%. The number of consultations has increased to 220.

Calculate the income elasticity of demand for medical services provided by this medical institution. Give it a rating.

Sample solution to the problem: E \u003d $(220-200) / 200 / 0.25$ \u003d 0.4

The income elasticity of demand is 0.4. This means that the population considers this service to be an essential service.

Questions for offset

1. Economic benefits: concept and classification.
2. Reproduction and its phases.
3. Economic systems. Types of economic systems
4. Demand. The law of demand. elasticity of demand. Individual and market demand. demand factors.
5. Types and characteristics of social needs.
6. System of indicators for macroeconomic analysis of the national economy (GDP, GNP, NNP, NI, Personal income)
7. Means of production. public production. Productive forces and production relations.
8. Functions of the state in a market economy.
9. Factors of production (resources) and their classification.
10. Market balance. Market pricing.
11. Production Possibility Curve.
12. The concept of the market and its functions. The main factors of the market. Subjects and objects of the market.
13. Commodity-money relations in society. Commodity production and goods.
14. Classification of markets. market infrastructure.
15. Fixed and working capital. The concept of bankruptcy. Physical and moral deterioration. Depreciation.
16. Sentence. The law of supply. The elasticity of supply. supply factors.
17. Market balance. Market price and equilibrium quantity. Changing Market Equilibrium
18. Inflation and its causes. Types and consequences of inflation.
19. Production costs and profit. Constants, variables and general; average and marginal cost of production.

20. Unemployment, its types, causes, consequences, methods of struggle.
21. The state budget. Types of budgets. The main items of income and expenditure of the state budget.
22. Entrepreneurship and its types. Essence and organizational-legal forms of entrepreneurship.
23. Functions of money and the law of monetary circulation.
24. Cost price. Price. Profit. Profitability.
25. The cyclical nature of the economy. The economic cycle, its phases.
26. Taxes and their types. Tax system.
27. The economic growth. Economic growth indicators
28. Production costs and profit. Constants, variables and general; average and marginal cost of production.
29. Banks and their role in the economy.
30. Ownership. Basic forms of ownership.

8. Educational, methodological and informational support for mastering the academic discipline (printed, electronic publications, the Internet and other network resources)
