

Summary of the working program of the academic discipline:

Assistant of Pediatric Dentist

General Educational Program of higher education (specialist) for speciality
31.05.03. "Dentistry

Department: Pediatric dentistry

1. The purpose of mastering the discipline (*participation in the formation of relevant competencies – specify the codes*):

The aim of the discipline: participate in the formation of competencies UC-1, GPC-1, GPC-2, GPC-6, GPC-8, GPC-9, GPC-11, PC-1, PC-2, PC-5, PC-6, PC-8, PC-9, PC-12.

2. Position of the academic discipline in the structure of the General Educational Program (GEP).

2.1. The discipline refers to the core part (*or the part formed by the participants of educational relations*) of Block 1 of GEP HE.

3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) or/and general professional (GPC) or/and professional (PC) competencies

No. n/a	Comp etence code	The content of the competence (or part of it)	Code and name of the competence acquisition metric	As a result of mastering the discipline, the students should:		
				know	be able to	possess
1.	UC-1	Ability to think abstractly, analyse, synthesise.	UC-1 . Is able to critically analyse problematic situations using a systematic approach, to develop a strategy of action	Basic principles and algorithms for analysing and synthesising information in the professional medical activity of the paediatric dentist	Analyse the situation and systematise the information on each clinical case in paediatric dentistry	clinical thinking, synthesis of findings and situation analysis depending on the specific clinical case in paediatric dentistry
2.	PC-1	Ability to diagnose dental diseases and pathological conditions of patients	PC-1. Ability and readiness to implement a set of measures aimed at preservation and promotion of health and including the formation of a healthy lifestyle of the patient (their relatives/legal	The basics of preventive measures for the formation of dental health in children and adolescents, the influence of hereditary factors and	Lectures, talks, discussions on the factors affecting the dental health of children and adults, the causes of major dental diseases among	methods of dental education, auditory, speech and illustrative motivation to promote the dental health of children and their

			representatives). Prevention of the emergence and/or spread of dental diseases, their early diagnosis, identification of causes and conditions of emergence and development, as well as prevention.	environmental factors on the The influence of hereditary factors and environmental factors on the occurrence of major dental diseases among the child population.	children and adolescents, and measures to prevent dental diseases in the family and in society.	parents.
3.	PC-2	Ability to carry out measures to prevent dental diseases	PC-2 . Ability and readiness to carry out preventive medical examinations, medical check-ups for different categories of citizens and to carry out medical check-ups for patients with dental pathologies	The basics of planning and carrying out preventive medical check-ups, check-ups and the implementation of follow-up care for children and adolescents with dental pathology.	Conduct preventive medical check-ups and follow-up care for children and adolescents with dental diseases.	methods for preventive dental check-ups of the maxillofacial region in children and adolescents of different ages and methods for the follow-up of children and adolescents with different nosological forms of dental diseases.
4.	PC-5	Application of the basic principles of the organisation of dental care in medical institutions and their structural subdivisions.	PC-5 . Ability and readiness to apply socio-hygienic techniques to collect and medico-statistical indicators of dental morbidity, quality indicators of dental care delivery.	Rules for the preparation and maintenance of medical records, including in the form of an electronic document, in medical institutions with a dental profile. Rules for	Draw up a work plan and report on the work. Complete medical records, including electronic records, and monitor the quality of the records. Analyse the medical and	Drawing up a work plan and a report on their work. Keeping medical records, including in the form of an electronic document. Supervise the performance of job duties

				<p>working in medical information systems and the information and telecommunication network "Internet". The duties of medical staff in dental health care institutions. The organisation, equipment and facilities of dental surgeries, departments and outpatient clinics. Health, safety and fire safety requirements, emergency procedures.</p>	<p>statistical indicators for the incidence of dental disease. Use health information systems and the Internet in their work. Supervise the performance of the duties of the medical staff on duty. Use patient personal data and patient confidentiality information in their work.</p>	<p>by medical staff on duty. The use of health information systems and the Internet. The use of personal information about patients and medical secrets in their work.</p>
5.	PC-6	Diagnosis of dental diseases and pathological conditions of patients.	<p>PC-6. Ability to identify in patients the main pathological conditions, symptoms, syndromes of dental diseases, nosological forms according to the International Statistical Classification of Diseases and Related Health Problems, X</p>	<p>Pathological physiology and pathological anatomy, clinic, diagnosis and differential diagnosis, nosological forms of the main dental diseases in children and adolescents according to ICD-10.</p>	<p>Identify in patients the main pathological conditions, symptoms, syndromes and nosological forms of dental diseases in children and adolescents.</p>	<p>methods The definition of pathological conditions, symptoms and syndromes of dental diseases and their nosological forms in children and adolescents.</p>
6.	PC-8	Conducting a medical examination	<p>PC-8 . Willingness to assess temporary disability, to participate in</p>	<p>The procedure for issuing certificates of incapacity for work. Medical</p>	<p>Identify signs of temporary care for a child with a dental disease.</p>	<p>Conducting an assessment of temporary incapacity to</p>

			<p>medical and social expert assessment, to establish the biological death of a person</p>	<p>indications for referral for medical and social expert assessment. Requirements for medical records.</p>	<p>Prepare medical documentation for referral of children with dental conditions to the federal state medical and social expert assessment institutions.</p>	<p>work to care for a sick child suffering from a dental disease. The registration of the necessary medical documentation for medical and social expert assessment in the federal state medical and social expert assessment institutions. Referral of children and adolescents with dental diseases for medical and social expertise. Issue certificates of incapacity for work, including for persons caring for a sick family member.</p>
7.	PC-9	Treating patients with dental problems	<p>PC-9. Willingness to determine the need for natural healing factors, medicines, non-pharmacological therapy and other methods in patients with maxillofacial diseases in need of medical rehabilitation and</p>	<p>Indications and contraindications for the use of natural healing factors, drugs, non-medicinal therapy and other methods in children and adolescents</p>	<p>Identify indications and contraindications for the use of natural healing factors, medication, non-medicinal therapy and other methods in patients</p>	<p>Has practical experience: determining indications and contraindications for the use of natural healing factors, medicines, non-</p>

			sanatorium treatment	with maxillofacial area diseases in need of medical rehabilitation and spa treatment; effectiveness and safety of non-medicinal therapy; specifics of interaction between methods of non-medicinal therapy in patients with maxillofacial area diseases in need of medical rehabilitation and spa treatment; an algorithm for carrying out physiotherapy procedures.	with maxillofacial diseases in need of medical rehabilitation and spa treatment; evaluate the effectiveness and safety of non-medicinal therapy; analyse the features of interaction between methods of non-medicinal therapy in patients with maxillofacial diseases in need of medical rehabilitation and spa treatment	medicinal therapy and other methods in children and adolescents with maxillofacial diseases in need of medical rehabilitation and sanatorium treatment; evaluation of effectiveness and safety of non-medicinal therapy; analysis of the interaction features of methods of non-medicinal therapy in patients with maxillofacial diseases in need of medical rehabilitation and sanatorium treatment
8.	PC-12	Participate in research and application in health and medical sciences.	PC-12. Willingness to participate in research, analysis and public presentation of medical information based on evidence-based medicine and to participate in the implementation of new methods and techniques aimed at	Basics of evidence-based medicine; main sources of evidence-based medical information; ways and forms of public presentation of	Search for medical information based on evidence-based medicine; interpret data from scientific publications; critically appraise	Has practical experience: Developing algorithms for the examination and treatment of adults and children with dental diseases

			protecting public health and reducing dental morbidity.	medical information; basic principles of medical research.	modern methods of diagnosis, prevention and treatment of diseases from the perspective of evidence-based medicine; argue for your choice of methods of diagnosis, prevention and treatment of dental diseases; prepare a presentation for public presentation of medical information, results of scientific research.	according to the principles of evidence-based medicine; searching for and interpreting medical information based on evidence-based medicine; public presentation of medical information based on evidence-based medicine; partial participation in a scientific study.
10.	GPC-2	Using the ethical and legal foundations of professional practice	GPC-2 . Ability to analyse their own performance to prevent professional errors	The procedure for the provision of medical care, clinical guidelines, taking into account the standards of medical care; the methodology for analysing the results of their own activities.	Analyse the results of the examination and treatment of patients with dental diseases; draw up an action plan to prevent professional errors based on the analysis of your own performance.	Participation in a clinical (clinical-anatomical) conference on professional errors
11.	GPC-1	Using the ethical and legal foundations of professional practice	GPC-1. Ability and readiness to implement ethical and deontological principles in professional	the basic principles of ethics and deontology of medical practice,	interact with children and young people of different ages, and interact	medical deontological skills in communicating with fellow

12.	GPC-6	Willingness to diagnose and treat diseases of the maxillofacial region in children and adolescents.	activity. GPC-6. Capable of examining a patient in order to establish a diagnosis in order to solve professional problems	adapted to the interaction with the team, children and their parents in pediatric dentistry. Knows how to collect the anamnesis of life and diseases, complaints from children and adults (their legal representatives); methods of examination and physical examination; clinical picture, diagnostic methods of the most common diseases; methods of laboratory and instrumental tests to assess the state of health, medical indications for the tests, rules of interpretation of their results; international statistical classification of diseases and health-related problems (ICD); conditions requiring medical care in emergency	with the parents of children in an ethical and deontological manner; Collect complaints, life and medical history in children and adults (their legal representatives), identify risk factors and causes of diseases; apply examination and physical examination techniques in children and adults; interpret examination and physical examination results in children and adults; diagnose the most common pathologies in children and adults; identify risk factors for cancer diseases; formulate a preliminary diagnosis, plan laboratory, instrumental and additional	patients and nursing staff. Has practical experience in: collecting complaints, life and disease history from children and adults, (their legal representatives), identifying risk factors and causes of diseases; examination and physical examination of children and adults; diagnosis of the most common diseases in children and adults; identifying risk factors for major cancers; formulating a preliminary diagnosis, making a plan for instrumental, laboratory, additional investigations, consultations with
