### Summary of the working program of the academic discipline

#### « Medical Rehabilitation»

General Educational Program of higher education (<u>specialist's degree programs</u>) 31.05.03 DENTISTRY

Department: Medical Rehabilitation

- **1. The purpose of mastering the discipline -** participation in the formation of relevant competencies GPC-12, PC-9
- 2. Position of the academic discipline in the structure of the General Educational Program (GEP).
  - **2.1.** The discipline refers to the core part of Block 1 of GEP. The discipline is taught in 6th semester /4th year of study.

# 3. Deliverables of mastering the academic discipline and metrics of competence acquisition

Mastering the discipline aims at acquiring the following universal (UC) or/and general

professional (GPC) or/and professional (PC) competencies

pı	cotessional (G	PC) or/and professiona	ii (PC) competencies			
			Code and name of the	As a result of mastering the discipline, the students should:

## Total labor intensity of the discipline is 2,1 CU (75,2 AH)

Type of educational work	Labor i	ntensity	Labor
	volume in	volume in	intensity (AH)
	credit units	academic	in semesters
	(CU)	hours (AH)	6
Classroom work, including	1,2	44	44
Lectures (L)	0.3	10	10
Laboratory practicum (LP)*	-	-	-
Practicals (P)	0.9	34	34
Seminars (S)	-	-	-
Student's individual work (SIW)	0.8	28	28
Mid-term assessment			
credit/exam (specify the type)	0.1	3.2	3.2
TOTAL LABOR INTENSITY	2.1	75.2	75.2

## 5. Sections of the academic discipline and competencies that are formed

№	Competen ce code	Section name of the discipline	The content of the section in teaching units
	GPC-12 PC-9	General issues of rehabilitation. Methods and means of medical rehabilitation.	General principles of rehabilitation The order of organization of medical rehabilitation.  Methods and means of medical rehabilitation. Features of examination in medical rehabilitation. Assessment of physical development. Goniometry. Assessment of the state of the musculoskeletal system. Evaluation of the functional state and rehabilitation capabilities of patients at the stages of medical rehabilitation. Functional stress tests. Definition of rehabilitation potential. The main scales and questionnaires used in medical rehabilitation.  International concept of functioning, disability and health.  International classification of functioning.
	GPC-12		Modern concepts of physiotherapy. Basic principles of therapeutic use
	PC-9	Fundamentals of physiotherapy. Therapeutic application of electromagnetic, mechanical and thermal factors in the system of medical rehabilitation.	of physical factors.  Methods of therapeutic application of physiotherapeutic factors of direct and alternating current, pulsed electrotherapy. Indications and contraindications. Features of preparing a patient for procedures, an indicative basis for actions during the execution of procedures.  Methods of therapeutic application of physiotherapeutic factors of high-frequency, ultra-high-frequency and microwave therapy.  Magnetotherapy. Therapeutic application of mechanical factors of electromagnetic nature. Methods of therapeutic use of physiotherapeutic factors: optical radiation, artificial aerodisperse media. Water, mud, heat treatment. Spa treatment.
	GPC-12 PC-9	General principles of exercise therapy. The place of exercise therapy in the system of medical rehabilitation.	General principles of exercise therapy. Means of exercise therapy features of the exercise therapy. Schemes for constructing therapeutic gymnastics procedure. Classification of therapeutic exercises.  Manifestations of immobilization (bed-rest) syndrome, changes in body systems.  Exercise therapy for patients with degenerative disk disease.

	GPC-12 PC-9	Features of medical rehabilitation of certain categories of patients and disabled people.	Medical rehabilitation for diseases and injuries of the maxillofacial region.
